**RHYTHMLINK INTERNATIONAL INTRODUCES
BENT SUBDERMAL NEEDLES**

COLUMBIA, S.C. - January 7, 2010 - Providing innovative and quality products, Rhythmink International, LLC has made testing procedures easier on the end-user. For the third time in the past six months, Rhythmink has expanded its Subdermal Needle product line with the launch of its new Bent Subdermal Needle Electrodes.

"The launch of this new product line of Bent Subdermal Needles is exciting. This is the fourth new product we have launched this year and illustrates that we listen to our customers and strive to provide them with products that fit their needs," said Daniel Smith, Rhythmink International product engineer.

This specialty needle is angled at 35 degrees, helping to keep the electrode in place during testing procedures. Rhythmink's Bent Subdermal Needle Electrodes are available in 1.5 and 2.5 meter leadwire lengths and six colors.

For more information about Rhythmink's Bent Subdermal Needles, other products or services, visit Rhythmink.com.
