**RHYTHMLINK INTERNATIONAL DISCOUNTS
INNOVATIVE SPIDER™ EEG ELECTRODES**

COLUMBIA, S.C. - July 16, 2009 - Rhythmlink International, a company that designs, manufactures and distributes neurodiagnostic accessories and provides custom OEM and manufacturing solutions, has recently instated a limited time discount on its patent pending, Reusable Spider EEG Electrodes.

This revolutionary product, distributed exclusively by Rhythmlink, provides clinicians with a unique alternative to traditional cups. Its spider-like webbing provides a greater surface area and superior adhesion to skin by becoming "one-body" with the paste or adhesive cream.

"The Spider EEG Electrode was originally designed with patient comfort in mind," said Shawn Regan, CNIM, one of Rhythmlink's partners and CEO. "And we've gotten an overwhelmingly positive response from clinicians who've tested this product. I think it's really going to impact the industry."

Until September 1, 2009, Rhythmlink's Gold and Silver/Silver-Chloride EEG Spider Electrodes in both 6 and 10 millimeter are on sale for only \$69.00 per box or \$6.90 per lead. Available in 1.0, 1.5, 2.0 and 2.5 meter leadwire lengths and 10 different colors, the Spider EEG Electrode offers and variety of options to fit most any clinical need.

For more information about this limited time sale on Reusable Spider EEG Electrodes, contact one of Rhythmlink's sales representatives: Leah Hanson or Stacey Askelson at 608.527.6571 and 218.624.4188, respectively.

For more information about Rhythmlink International, its other products or services, visit Rhythmlink.com or call 866.633.3754.
