**RHYTHMLINK INTERNATIONAL PARTICIPATES
IN PREMIER NEURO DAY EVENT**

COLUMBIA, S.C. - August 10, 2009 - Recently, Rhythmink International, LLC, a company that designs, manufactures and distributes neurodiagnostic accessories and provides custom OEM and manufacturing solutions, sent a group of employees to Clemson University to participate in the first ever Neuro Day.

"At Rhythmink we're always looking for ways that we can impact our industry, and many times the best opportunities come through promoting education and research at events like Neuro Day," said Rhythmink's CEO Shawn Regan.

Neuro Day is a meeting of clinical, academic and industrial organizations with interests in the research and development of neurology and biomedical engineering. The event was created in hopes to spur communication and education within these two industries.

Rhythmink's team, consisting of Regan, Director of Engineering and Regulatory Affairs Jim Mewborne and Product Engineers Daniel Smith and Aron Olson, met with groups from Clemson University and the Medical University of South Carolina for this premier event.

The meeting began with overviews of Clemson's bioengineering program, MUSC's neurology program and a presentation by Regan on Rhythmink's neurology applications and research needs. The group then toured Clemson's bioengineering facility and discussed bioengineering research and potential neurosurgery and neurology applications.

"I found the experience highly motivating," said Mewborne. "It was jaw dropping to see what the bioengineering field is doing, and getting the neurosurgeons and neurologists involved is going to produce amazing new techniques in the medical field."

For more information about Rhythmink International's participation in Neuro Day, its products or services, visit Rhythmink.com or call 866.633.3754.
