**RHYTHMLINK INTERNATIONAL RELEASES
CORKSCREW NEEDLE ELECTRODE**

COLUMBIA, S.C. - March 31, 2009 - Rhythmlink International, a designer, manufacturer and distributor of neurodiagnostic accessories and custom OEM and manufacturing solutions, recently announced the newest addition to its Disposable Subdermal Needle family of products, the disposable Corkscrew Needle Electrode.

This new product has a twisted needle design to provide a larger surface area for recording and stimulating, easy skin penetration, secure patient attachment and low electrical impedance. In keeping with the rest of the Rhythmlink's current subdermal needle line, the Corkscrew Needle Electrode is cleared for both recording and stimulating, is pre-sterilized and made for single-patient use to avoid cross contamination risks.

In addition to expanding its product lines, Rhythmlink has significantly grown in terms of market share, number of employees and sales since its establishment in 2002. Recently named to Inc.'s Fastest Growing 5,000 list, Rhythmlink continues to take advantage of growth opportunities through increasing its custom engineering capabilities and participation in the *SC Launch!* program.

For more information about Rhythmlink, its Corkscrew Needle Electrode, other products or services, visit Rhythmlink.com.
