**RHYTHMLINK INTERNATIONAL LAUNCHES  
SHORTER SUBDERMAL NEEDLES**

COLUMBIA, S.C. - September 30, 2009 - Rhythmink International, LLC, company that designs, manufactures and distributes of neurodiagnostic accessories, has added Shorter Subdermal Needles to its ever-growing line of commercial products.

"Releasing Shorter Needles is exciting for us because we're committed to providing customers with what they want," said Michael O'Leary, chief operations officer of Rhythmink. "If shortening the needle length can provide clinicians with a product that yields better quality results, we want to make that product variation available."

Roughly half the size of Rhythmink's original Subdermal Needle, the Shorter Subdermal Needle Electrode features a seven millimeter needle that better accommodates for testing on children and small-framed adults. Shorter Needles are available in 1.5 and 2.5 meter leadwire lengths and six different colors: red, green, white, black, blue and yellow.

For more information about Rhythmink's Shorter Subdermal Needles, other products or services, visit [Rhythmink.com](http://Rhythmink.com).
